

**FAASTeam presents:**

# **Fly The Aircraft First**

NTSB accident data suggest that pilots, while distracted by less essential tasking, have lost control of their aircraft and crashed. In light of this pilots are reminded to maintain aircraft control at all times. This may mean delay in responding to ATC communications and passenger requests or not responding at all unless positive aircraft can be maintained throughout. In other words, Fly the Aircraft First! NextGen is a transformational approach to updating the National Airspace. The advent of radar vastly changed the way aircraft are separated. With GPS and satellite communications we are in another technology jump in increasing capacity and introducing performance based navigation concurrently. We will look at how things will change, what equipment is required and what you can do to make the transition for you the pilot smooth and safe.

**Directions:** Arriving from 75 South or north exit Jones Loop Road follow signs to Punta Gorda Airport enter airport towards airline terminal turn right the south end of the airport to the EAA Bldg.

#### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

## **Event Details**

**Sat, Jan 24, 2015 - 14:00 EST**

**Punta Gorda Airport**

EAA 565 Punta Gorda Airport

EAA Bldg

Punta Gorda, FL 33982

**Contact: MILTON RAY KALETTA**

**(941) 575-2821**
